

March 2013 EU Workgroup Actions

- **EU0301** 06/03/14 3.1 *Balancing Code* - Confirm with National Grid NTS Network Flexibility Project Team how any interface with the EU Tariff Network Code will be addressed. National Grid NTS (CS).
- **Colin Hamilton is to give a verbal update at the April EU Workgroup.**
- **EU0302** 06/03/14 3.1 *Balancing Code* - Review NEAs and legacy contracts, identify any impacts and consider whether these should be in scope. National Grid NTS (CS).
- **NTS are evaluating the changes required to NEAs and other contracts to accommodate the implementation of the Gas Day and other EU changes. However, NTS are not looking to use this opportunity to clarify that terms in NEAs are not WDOs.**
- **EU0303** 06/03/14 3.1 *Balancing Code and Gas Target Model* – National Grid NTS and Ofgem to provide the Workgroup with an overview. National Grid NTS (CS) and Ofgem (RMc). **EU0304** 06/03/14 3.1 *Balancing Code and Gas Target Model* – National Grid NTS and Ofgem to provide the Workgroup with an update on the legal position. National Grid NTS (CS) and Ofgem (RMc).
- **The Gas Target Model actions are to be covered by NTS on the agenda of the April EU WG.**
- **EU0305** 06/03/14 3.2 *Balancing Code – Nominations Process at IPs - Virtual Reverse Flow at Moffat* – Provide an indication of how CAM and nominations might work in relation to both bundled and unbundled products. National Grid NTS (CS).
- **Phil Lucas and Matt Hatch. Response:** Reverse flow is interruptible so its not bundled and only offered as a Day Ahead interruptible product. In terms of nominations, as now these will be required in respect of virtual reverse flow so under the new nominations rules National Grid would expect a double sided nomination with a flow direction indicator of Eire to GB or NI to GB for nominations against the unbundled capacity product “day-ahead interruptible reverse flow capacity” at Moffat.
- **EU0306** 06/03/14 3.4 *Tariff Code and Incremental Capacity Amendment* – Provide an indication of ‘Postage Stamp’ costs for the UK. National Grid NTS (CH)
- **Colin Hamilton is to give a verbal update at the April EU Workgroup.**
