Communication Ref : LJ/1025/DA
Subject : TRF Hierarchy V7 for Representation

Dear Colleagues,

It has been identified that the optionality displayed in the *.TRF file hierarchy v6 Live is incorrect, and requires change.

There are instances where the S66 'Contact Details' record can be provided without a subordinate S67 'Contact Point' record in the TRF file. This will occur when xoserve does not hold the relevant data as a result of not receiving the S67 record within the incoming file, i.e. the S42 'Confirm Non Competitive Supply Point'.

This change is intended to correct the UK Link file formats so is proposed as a Class 1 UK Link modification.

Your comments are invited on this change, and the intended classification by Friday 24th December. Should this change be approved as a Class 1 change this will be implemented early within the New Year.

Yours faithfully

Dave Ackers
