RWE npower Ltd	Steph Shepherd	27/07/12	Accept	Yes	<p>Further to the discussion at the UK Link Committee meeting on 12/07/12, regarding the use of the .SUN file, RWE npower do not support the removal of the file. This would limit our ability to actively manage our Gas portfolio, and as such we would suggest that the .SUN file remains in its current form.</p> <p>In terms of the other options considered by the SWIG, we would also reject the suggestion to mandate the submitting the file on the EFD, as we believe that this would present a risk to Suppliers to withhold the file until the actual EFD.</p> <p>Therefore, an approach to develop the file to contain a future 'effective from date field' would better meet the needs of the DCC.</p>	<p>Thank you for your feedback. We note your comments.</p> <p>We will look to develop options that support providing a means to maintain Supplier organisation detail, and an effective date.</p>
