Forecast Under / Over Recovery (K)	9.6	0.0				
Arithmetical October Price level change needed for Collected to = Allowed	64.3%	-11%				

Commentaries

2007/08

The forecast under-recovery is broadly in line with the assumptions and revenue targetted when charges were set during 2007/8. Prices were set to under-recover by £10m in London as a measure to smooth price volatility going forward.

There have been small changes in expected collected revenue due to throughput and SOQ changes

2008/9

3% reduction in SOQs assumed in October 2008

Ofgem included cost pass through into the core allowed (these values have been reallocated in this report for consistency with 2007/08 numbers)

Shrinkage, Exit, Emission, Loss of Meter Work and DNMRA forecasts included on 2008/9 Incentives & Adjustments

Capacity / Commodity Split changes - 95/5 change to take effect on the 1 October 2008

The October price change is based on the current structure of charges, the following scaling factors should be applied after uplifting / reducing the current prices by the change needed above:

LDZ System & CSEP System Commodity -

0.1266

LDZ System & CSEP System Capacity -

2.0830
