

Subject: MP/717/MP - Description Amendment in ECO File Format - Implementation of Change

Colleagues,

Further to the February UK Link Committee meeting, the description changes in the ECO file format (CR13830) have been agreed for immediate implementation as a class one change. This is earlier than was proposed in communication NR/702/AS (sent 12th January 2007).

As such, the ECO File Format V2 Live is now available on the UK Link Extranet site, and has been attached here for your convenience.

Regards,
Max
