Distribution List Not Shown  
Subject: MP/783/NR: Shipper Access to Gemini Systems - Second Update  
26th October

## **Joint Statement from National Grid and xoserve**

### **MP/783/NR: Shipper Access to Gemini Systems – Second Update 26th October**

Please be advised that the Gemini system is now available for Users to logon and make Entry / Exit flow re-nominations, NBP and capacity trades for Gas Day 26<sup>th</sup> and 27<sup>th</sup> October.

Capacity bids for DISEC (27<sup>th</sup>) and WDDSEC (26<sup>th</sup>) have been manually input for system allocation. An update on DISEC for Gas Day 28<sup>th</sup> and firm release (WDDSEC) for 26<sup>th</sup> and 27<sup>th</sup> (DADSEC) will be issued shortly.

The agency telephone service will remain in effect until 17:00hrs for additional assistance in relation to Gas Day 26<sup>th</sup>. Where Users have previously provided data in relation to 26<sup>th</sup> it is imperative that agreement is reached with the relevant agent on how to manage any backlog. From this point forward would Users refrain from providing additional data. Agents will contact you in due course to agree this.

At this stage we would ask that questions relating to previous Gas Days are not raised pending completion of our reconciliation process.

No API's are available at this stage. Updates will follow in due course.

The Gemini screen 'OCM / OTC trade details' is not available in production. This information can be found via the 'Business Associate Balance' in the nominations menu.
