## UKLink Programme - Medium Level Transition & Cutover Plan

Note 1: This plan was produced as part of preparations for UKLP Implementation on 1st October 2015. As a result of the recommendation from Project Nexus Implementation Steering Group to delay Market Trials and therefore implementation, details in this plan have now been superseded. As a result, this plan had not completed internal and external review cycles and is presented "as seen".

Note 2: Xoserve will prepare and publish a revised Medium Level Plan in preparation for the revised implementation date (when known).

Note 3: Retrospective Adjustments and Unique Sites functionality was out of scope for the October 2015 implementation.

Note 4: Exact timings will be presented in the Low Level Transition & Cutover Plan.
