Shippers Initiating an Amendment to an IA

To address Shippers concerns with IAs, National Grid NTS is proposing the following:

- A Shipper may raise a notification relating to Relevant Interconnection Provisions where they are being adversely affected
- National Grid NTS will within 30 business days of receiving the notification respond by:
 - a) Proposing an amendment to the Adjacent TSO; or
 - b) Reply setting out why it does not consider it appropriate to propose an amendment; or
 - c) Invite the Shipper to discuss the issue further and within 30 business days carry out a or b

Liability Provision (1)

- Feedback from Shippers
 - 1) Clause was not sufficiently specific and therefore too general; and
 - 2) There was no scope for resolution of TSO errors, related to the new IA processes e.g. matching regime
- In response to the feedback we are proposing a two part solution
 - 1) Identify clearly what the TSOs are seeking indemnity from i.e.:
 - Capacity bundling;
 - Matching or allocation provisions;
 - Accepting delivery of gas or making gas available for offtake; and
 - Gas complying with specification at the IP

Liability Provision (2)

2) Error correction by TSOs

- Where a TSO makes an error implementing the nominations and allocation matching processes
 - Shippers can request an error correction within Close Out timescales i.e. on or before D+5 to avoid impacting energy balancing
 - Nomination error attributable to the TSO may be rectified within day where possible
- TSOs investigate and agree with all parties to a correction utilising a revised CNQ for allocation purposes

Your feedback is important to us

- We'd like to capture your contact details today to keep you informed of developments
 - We may also contact you for specific feedback
 - If you'd prefer not to be included please do let me know
- You can contact me to tell us how we are doing, particularly on the topics discussed today:
