Dear Colleague,

The energy balancing release of Gemini went live on 18th October 2005, replacing the AT-Link functionality, Gemini has been adopted as the energy balancing and auctions system for the Gas market.

AT-link has been available in a read only state since 30th Oct 2005 at which time the following message was posted on the AT-Link logon screen;

"AT-Link is now read only and will be decommissioned on 30th Nov 05.

Please call the help line for more info on 0044(0) 800 9177111"

Analysis has shown that the level of usage experienced on AT-Link since beginning of November has been 1 shipper per day for an average of 2 mins. Furthermore in line with the common understanding within the industry forums, access to AT-Link will be removed for all users at 18:00 on 30th Nov 2005.

Regards

Simon Cave
