NR/153/MN - Gemini Disaster Recovery outage request 31st August 2005

Dear Colleague,

In order to complete the Disaster Recovery testing being carried out by the Gemini project to test internal warm stand-by before implementation in October, the outage below is requested for the Gemini Entry Capacity system (Gemini EC).

This follows on from the outage which took place on the 18 August 2005, when lessons learnt on the synchronization of the batch scheduler resulted in the cancellation of the outage planned for the 19 August 2005.

The proposed planned outages for Disaster Recovery Test 6 are:

13 September 2005 02:30 - 08:30

14 September 2005 02:30 - 08:30

If there are any queries with the above, please do not hesitate to contact myself,

Regards

Mark Nicolson
