

NR599DA - Representation Comments Matrix For Adhoc Invoice Remittance Hierarchy Diagram (ADH)

Shipper	Name	Date	Accept /Reject	Publish	Shipper Comments	
NPower	David Mayne	22/02/06	Accept	Yes	No issues. Support	We will update the extranet in line with the changes for CR13664 in March 2006. David Addison
Scottish Southern	Cher Harris	24/02/06	Accept	Yes	We accept this change; however, it will result in a system change for us, as we have coded our systems according to the documentation that was published on your website. We would draw your attention to the fact that 2 of the 4 changes issued on 10th February relate to instances of incorrect documentation being formally published on the Xoserve website. We therefore seek assurance from Xoserve that the quality of the documentation published on your website in future will be significantly improved and we would be interested to hear what plans you are putting in place to achieve this	We acknowledge your comments but highlight that the communication of these Class 1 Modifications were requested by UK Link Committee to highlight to all users the changes being made, even those of a very minor nature. Controls have been applied to ensure that future UK Link Modifications documentation is updated. These controls have been discussed previously at UK Link Committee and are now in place. These changes are as a result of projects implemented prior to such controls being in place. David Addison
