NR/602/DA - Issue of M Number Disc in DVD Format, withdrawal of CD format.

Dear Colleague,

Please note that with effect from July 1st, 2006 xoserve will produce MNumber Database discs in DVD-R format only. The format of the files on the disc does not change.

This was discussed at the UK Link meeting, and with the users present broadly supportive, this notification is for your information.

Following issue of the M Number Discs in April 2006 shippers currently using CD may request a copy of the DVD version for testing purposes prior to July.

Currently some users are using the DVD-R formatted versions.

Alternatively you may wish to avail yourself of the features within IAD from our website www.xoserve.com <<http://www.xoserve.com>>

This communication is issued for information.

Any queries should be addressed to InternetComm.spa@xoserve.com

Regards

David Addison
