NR/607/DA - UKL 13723 Introduction of New Rejection Code OJT00018

Dear Colleague

Validations on UK Link currently allow incumbent Shippers more than 7 days to raise an objection where the confirmation is sent more than 14 days in advance of the effective date. The requirement, which has been highlighted by Shippers in Operational Forums, is to introduce a validation which will prevent an objection being raised after the 7th day therefore complying with Section G 2.8.1.b of the UNC.

This will require the below new rejection code to be added to the SPA Amalgamated Rejection List.

Rejection Code - OJT00018.

Message Text - Objection should be sent within seven working days of issue of withdrawal notice

If an objection is received after the 7th day of notification the above rejection code will be sent to the shipper within the WOR file and will appear on the S12 and S72 record.

Representations are sought from Users regarding this change and its implementation date. It is intended to observe the notice periods envisaged under Section U of the UNC, and implement this change as part of the November 2006 release.

Regards

David Addison
