NR/623/DA - M03 File Format update

Dear Colleague,

It has been highlighted that the MRBillReads (MBR M03) file format published on xoserve's Extranet has a format error, meaning some data is truncated within the file format.

Find attached a reformatted version to be updated

Whilst undertaking this change the opportunity has been taken to revisit the document. Reference to Transco within the file format has been corrected and the 'Occurs Max 1' has been removed from the M03. This is intended to be a documentation only change.

A hierarchy diagram is also to be added to Extranet for this file format.

We propose to undertake this change as a Class 1 UKLink Modification as there are no changes to the functionality of UKLink systems. Users comments are invited on this matter by 28th April 2006. Once we have ratification from Users, notification will be sent when the revised file format is updated on xoserve's Extranet.
