NR/634/SM - UKL13693 On-line Optional Tariff Invoicing and Entry Commodity Invoicing - Implementation Outage Notification 2 July 2006

Dear Colleagues,

The agreed Change 13693 will be deployed on 2 July 2006 in accordance with the timetable established under UNC Modification 010. This implementation requires a system outage on the Gemini Application over-and-above the accepted 4 a.m. – 6 a.m. scheduled maintenance outage. Please accept this mail as notification of an outage between the hours of 4 a.m. and 11 a.m. on Sunday 2 July 2006.

As is required with all implementations, this outage window includes time between 9 a.m. and 11 a.m. to back-out the changes in the unlikely event that implementation is unsuccessful. During the outage the standard 'Maintenance Window' will be visible. Assuming implementation activities are successful, I shall endeavour to restore the system to its Production Status at 9 a.m.

I trust this is acceptable to you, but if you have any questions then please contact me to discuss.

Regards

Simon McKeown
