NR/640/DA - Re: NR/610/DA - Temporary Change to Cyclic Meter Reading Validation Routine

Dear Colleague

As per the above previously notified change that extended the permissible parameters for the acceptance of non opening meter readings from 10 business days to 99 business days. Please be advised that the validation rule was reverted back to 10 business days after the completion of the Unbundled Meter Reading process on Friday 16th June 2006. Subsequently any meter readings processed on and after Monday 19th June 2006 will be subject to the 10 day validation rule as per UNC section M.3.3.6.

Please do not hesitate to contact me if you wish to discuss this matter further.

Regards

David Addison
