Subject: NR/648/DA - UKLink Committee Important Dates for 2007 Calendar

Dear Colleague,

UKLink Committee Important Dates for 2007 Calendar

Please find attached the following documents pertaining to forthcoming administration associated with UKLink Committee Meeting that were discussed at the August 2006 meeting.

2007 Release Implementation Dates:

The implementation dates for 2007 are:

Friday 23rd February 2007

Friday 29th June 2007

It is currently anticipated that the November 2007 release is reserved for the UKLink Systems Technology Refresh. Updates on this matter will be given on a regular basis through the UKLink Committee Meeting, and discussions regarding a November 2007 release were deferred until more information is available to the Committee.

As previously discussed at the Committee, the implementation dates will vary dependant upon the UKLink system impacted – for example, implementations concerning non-Gemini systems (for example, Sites and Meters systems) will typically be at the completion of the batch schedule processing for that business day, whereas Gemini systems may seek to use the regular maintenance outage.

Notification of 2007 Non Business Days for UKLink Systems.

This timetable does not include any potential non business days that may be required for UKLink Systems Technology Refresh. As above, the Committee will be informed regarding the need for non business days as a result of this matter.

Modification 613 Timetable: This document provides details of when xoserve will issue the Implementation Summaries and Change Packs to Users for Representation. The timetable covers July 2006 to June 2007.

Should you have any questions or comments arising as a result of this communication, please do not hesitate to contact me.

Regards
