Subject: NR/654/DA - Use of Email Communications in the Event of Gemini Contingency

Dear Colleague,

NR/654/DA - UKLink Manual Update - Use of Email Communications in the Event of Gemini Contingency

Following close out for comment on communication NR/649/DA, the UKLink Manual Appendix 5a will be updated on Friday 1st September 2006 to include email communications for the following contingency procedure. **This update is a documentation only change, so use of email in the event of a Gemini contingency would be an acceptable communication route.**

C05/9009 "Gas Trades and Gas Flow Input and Output Nominations/Renominations – Business Associate connection to Gemini Fails."

This procedure uses either the

- C008 Renominations Contingency Form
- C008F Nom File Format

The formats, as currently published, include the option of the provision of this information via email; therefore the formats themselves will not be updated.

As stated in the email, only Appendix 5a will be amended and no other documentation will be modified.

Regards
