Subject: **NR/658/DA - S59 inconsistant values - Change Pack 1 of 2**

NR/658/DA - S59 inconsistent values – Change Pack 1 of 2

Dear Colleague

It has been highlighted that the S59 Record published on the UKLink Docs Extranet does not include two allowable values that are currently being issued by the UKLink system.

The SUPPLY\_POINT\_CATEGORY field should also include the values:

**DMAI** – Daily Metered Aggregate Interruptible

**DMAF** – Daily Metered Aggregate Firm

The field will be updated to be consistent with the allowable values for this field in the S10, S15, S64 records.

This change is considered as a documentation only change and as such it is proposed that it will be implemented as a Class 1 change. Provided that no adverse comments are received the file formats published on UKLink Docs Extranet will be updated.

Should you wish to provide any comments on this change, please provide these to [uklink@xoserve.com](mailto:uklink@xoserve.com) no later than Friday 29<sup>th</sup> September 2006

<<S59 V3 Draft.pdf>>

Many Thanks
