NR/662/NM - Re: NR/608/DA - CR13730 Post Closeout Amendments functionality for Gemini (Planned Outage 5th November06)

Colleagues,

The agreed Change 13730 will be deployed on 5<sup>th</sup> November 2006 in accordance with the timetable established under UNC Modification 010. This implementation requires a system outage on the Gemini Application over-and-above the accepted 4 a.m. – 6 a.m. scheduled maintenance outage.

Please accept this mail as notification of an outage between the hours of **4 a.m. and 12 p.m. on Sunday 5<sup>th</sup> November 2006.**

As is required with all implementations, this outage window includes time between 9 a.m. and 12 p.m. to back-out the changes in the unlikely event that implementation is unsuccessful. During the outage the standard 'Maintenance Window' will be visible. Assuming implementation activities are successful, I shall endeavour to restore the system to its Production Status at 9 a.m.

In the unlikely instance that a back-out of the changes is required, we shall endeavor to restore the system to its Production status as soon as possible. As soon as this has been achieved, formal notification will be provided through the normal route.

I trust this is acceptable to you, but if you have any questions then please contact me to discuss.

Regards

Neil Morgan
