PN UNC Workgroup

Non Functional Topic
24th January 2012

Objectives of the Workgroups

- To determine the principles for future determination of non-functional requirements
  - Consider/review comments made during the Project Nexus consultation
  - Review existing Modifications relevant to the topic area
  - Monitor & align with latest SMIP position
  - Focus will be on the non-functional principles for Project Nexus

- Workgroup deliverables;
  - Business Principles Document to provide sufficient definition around to:
    - Inform the GT/Xoserve strategic architecture requirements
    - Enable the proposed principles to be incorporated into systems requirements for Xoserve's investment decisions
    - Support the raising of any UNC Modification Proposals

respect 〉 commitment 〉 teamwork

Approach & Workplan

- ## Agree scope
  - And areas for consideration
- ## Consider requirements from other relevant Workgroups;
  - Settlement
  - Invoicing
  - AQ
  - Reconciliation
  - PN UNC
  - Retro Updates
- ## Consider any relevant live Modifications
  - None at present?
- ## Agree & document future principles

respect 〉 commitment 〉 teamwork

Project Nexus Consultation Responses

- The Initial Requirements Register (IRR) contains items that have a non-functional aspect (some items have both functional and non-functional aspects)

- Items in the IRR that have a non-functional aspect have been grouped into the following categories:
  - Data Access
  - Data Transfer
  - Data Custodian/Validation
  - Data Update Lead-time
  - Data Retention
  - System Flexibility
  - System Scalability (Volumes)
  - System Documentation
