

Project Nexus

PNSG RGMA Update

18th April 2016

Xoserve delivery of RGMA functionality is now materially complete and will be available to support meaningful Market Trials from 18 April 2016.

<p>Xoserve RGMA testing key messages (as of Saturday 16 April)</p>	<ul style="list-style-type: none"> • All Core testing, including regression testing, is complete. • Non-core testing is 93% complete (2 minor steps outstanding). • Validations Testing: <ul style="list-style-type: none"> • 4 High Volume validations are outstanding – 3 expected to be fixed over the weekend. Total occurrence of the 4 validations per month constitutes 1% of all transactions. • 32 Low Volume test cases are outstanding - 18 AMT expected to be fixed over the weekend. Total average occurrences for all 32 validations constitute 0.1% of all transactions. • The remaining minor issues will be closed out through the completion of residual testing activity.
<p>Key messages from MTWG call on 15 April</p>	<ul style="list-style-type: none"> • Based on the RGMA testing status presented by Xoserve, it was considered by the MTWG that Market Trials of RGMA functionality could commence on Monday 18 April 2016. • Two additional pieces of information were requested by the MTWG to support Market Trials, which will be provided by Xoserve. These related to the file types and defect references associated with the outstanding elements of non-core RGMA. • It was considered prudent for the MTWG to monitor the progress of Market Trials with respect to RGMA functionality in the MTWG meetings scheduled for 20 and 28 April.

The delivery of RGMA functionality is a positive step forward for Project Nexus to enable more extensive Market Trialling. Ofgem, Xoserve and PwC ask participants to now fully commence Market Trials of the RGMA functionality.
