Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

This modification places obligations on iGTs to provide the relevant data to Xoserve that is required in order to support the implementation of Modification 0440. Xoserve currently do not have this data, which is integral to the success of iGT single service provision under Project Nexus and will allow iGTs to utilise the services of Xoserve to administer relevant Supply Points downstream of the Connected Systems Exit Points. Implementation of single service provision will bring significant benefits to the Gas Industry.

Are there any new or additional issues that you believe should be recorded in the Modification Report?
