Date of Representation:	09/08/16
Support or oppose implementation?	Support
Relevant Objective(s):	c) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

After an industry consultation on proposed amendments, Ofgem directed a change to the gas DSR methodology on the 7th July 2016.

Consequently, UNC is no longer aligned with the gas DSR Methodology.

National Grid is obligated to implement the gas DSR Methodology through revisions to UNC, therefore these approved changes now need to be reflected in UNC.

Self-Governance Statement:

This modification should be subject to self-governance because it is enacting a consequential change to the gas DSR Methodology which has been approved by Ofgem, and therefore does not require further authorisation.

Implementation:

We agree that this Modification Proposal can be implemented with immediate effect 16 business days after an approval decision by the UNC Modification Panel in August.

Gas Demand Side Response has an effective date of 1st October 2016, so an approval decision made after the August Panel would result in this Modification not being implemented until after the Gas Demand Side Response go live date.

Impacts and Costs:

No User Pays costs have been identified for this Modification.

Legal Text:

National Grid NTS is satisfied that the legal text delivers the intent of the Modification proposal.

Are there any errors or omissions in this Modification Report that you think should be taken into account?

No.

Please provide below any additional analysis or information to support your representation

Not applicable.
