<b>Representative:</b>	Graham Jack
<b>Organisation:</b>	British Gas Trading Limited
<b>Date of Representation:</b>	11 August 2016
<b>Support or oppose implementation?</b>	Support
<b>Relevant Objective(s):</b>	c) Positive

**Reason for support/opposition:** Please summarise (in one paragraph) the key reason(s)

The modification proposal seeks to align the UNC with the recently revised DSR Methodology, the revision having been sanctioned by Ofgem. This proposal therefore essentially completes the change process.

**Self-Governance Statement:** Please provide your views on the self-governance statement.

Self-governance is appropriate since the proposed changes will not have a material impact on transporters, shippers, suppliers or consumers.

**Implementation:** What lead-time do you wish to see prior to implementation and why?

In line with self-governance timescales.

**Impacts and Costs:** What analysis, development and ongoing costs would you face?

None identified.

**Legal Text:** *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

**Are there any errors or omissions in this Modification Report that you think should be taken into account?** *Include details of any impacts/costs to your organisation that are directly related to this.*

None identified.

**Please provide below any additional analysis or information to support your representation**

As things currently stand, implementation is required to give effect to a DSR methodology change already endorsed by Ofgem. Although proposed changes to the DSR methodology were formally consulted on, we would welcome the Panel's views on whether the governance of the UNC change process is, to some extent, being subordinated.
