Draft Modification Report

0514 - Extending the Daily Metered 'voluntary' service to Project Nexus Implementation Date plus six months

Consultation close out date: 09 December 2014
Respond to: enquiries@gasgovernance.co.uk
Organisation: E.ON
Representative: Colette Baldwin
Date of Representation: 21 November 2014

Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

As the Shipper isn't permitted to predetermine which product the customer should transition to in advance of Nexus Go-Live, under the Nexus BRD's DMV customers will default to being Product Class 4 on go-live, which is not a daily metered product. Many of the important features of their supply may be disrupted affecting billing and settlement processes which would be detrimental to both the customer and the shipper/suppliers. The customer would then face a further transition from Class 4 on go-live to another class to return on a daily product.

This modification allows a managed transition to alternative Product Classes, but doesn't perpetuate DMV within the same category as DMM.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

None

Relevant Objectives:

We support the view as set out in the Modification Report of the positive impact on the Relevant Objective F.

Impacts and Costs:

No specific system development for this modification is required outside of changes already planned for Project Nexus.

Implementation:

We will need to put in place a business process to identify and migrate the sites to the appropriate product classes, therefore we
