Support or oppose implementation?	Support
Relevant Objective:	d) Positive f) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support this modification proposal. Our reason for this is that this will closer align itself with the electricity industry which is a successful process and leads to greater allocation of energy. We hope that this will therefore lead to less unallocated gas charges to be shared between Shippers and lead to a more balanced industry.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

We would like to see a Pre Nexus implementation. We feel this would be in best interest to ensure a smooth transition.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

We anticipate no further impacts or costs.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

We are satisfied with the legal text

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No
