Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

The proposed automation of these processes will provide for more accurate cost allocation to industry participants. The swifter correction of data will have an enduring benefit by better enabling the smoother rollout of smart metering (by a reduction in the number of incorrect meter details held in central systems)

Are there any new or additional issues that you believe should be recorded in the Modification Report?

No

Relevant Objectives:

How would implementation of this modification impact the relevant objectives?

Relevant objectives (d) (i) and (ii) and (f) would be satisfied by implementation of this proposal.

Impacts and Costs:

What analysis, development and ongoing costs would you face if this modification were implemented?

Actual costs for internal changes are difficult to quantify at this point, however the enduring benefit of the specific changes proposed by this modification provide benefits with regards to a reduction in manual workarounds.

Implementation:

What lead-time would you wish to see prior to this modification being implemented, and why?

We fully support the stipulated implementation date of October 2015.
