Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Arrangements enabling Users to retrospectively replace Metering Information would enable more accurate relevant Transportation and Energy Balancing invoices through an improved reconciliation process. This retrospective updating of metering information should help support elements of Smart meter roll out and it is likely that the costs of implementing the modification could increase if not developed and implemented alongside Project Nexus.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

No
