FINAL AUG TABLE FOR AUG YEAR 2014/15

Dear Colleagues

In accordance with the “Guidelines for the Appointment of an Allocation of Unidentified Gas Expert and the provision of the Allocation of Unidentified Gas Statement” (“the Guidelines”) the AUGÉ provided a final table of Unidentified Gas Volumes to Gas Transporters on 23 December 2013. The Gas Transporters have an obligation under the Guidelines to publish the final AUG Table of volumes, along with an estimate of the rates to be levied, by 1st February. The Gas Transporters have asked Xoserve to publish the document “Final 2013 AUG Table for 2014_15” to satisfy this requirement.

It should be noted that the SAP (System Average Price – i.e. gas price) rates are only indicative and will remain so, as the actual rate applied each month will be the average SAP for the reconciliation month in question.

The Table has been updated by the AUGÉ since the publication of the Draft Table in October, as a result of more up-to-date information, or as a result of Queries received and upheld under the Query process, where UNC permitted such a change. Those Queries were discussed at the scheduled UNCC meetings in November and December, and in each case the meeting endorsed the AUGÉ’s proposed course of action, as required by the Guidelines.

Next Steps

UNC (E10.4.3) requires the AUGÉ to submit the Final Table to the Committee. The Final Table will therefore be presented to UNCC at its scheduled meeting on January 16th. The possible outcomes are: adoption of the Table; revision of the Table by unanimous agreement of the meeting; or unanimous agreement to require further iteration.

If you have any queries on this communication please do not hesitate to contact me. Queries on the details within the AUGS or AUG table should be directed to the AUGÉ at one of the addresses on the front page of the Table. Following a recent merger, GL Noble Denton is now known as DNV GL and the Final Table reflects the new business name.

Yours sincerely
