Do you support or oppose implementation?

Support.

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

Updating the table that enables shippers to correct erroneously high AQ values for domestic customers with the revised AQ values proposed in the modification will allow shippers to incur gas and transportation charges that are more representative for those customers. Over the past several years there has been a significant level of demand destruction in AQ values and this table has not been updated to reflect this.
