Do you support or oppose implementation?

Support

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

SGN supports this modification as the updating of the CSEP NExA AQ table will reflect the current AQ data. We accept the need to continually review the AQ data so that it's reflective of the actual demands on networks. We also acknowledge that continued improvements in the energy efficiency of buildings will introduce lower AQ values.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

No

Self Governance Statement:

Do you agree with the Modification Panel's decision that this should not be a self-governance modification?

Yes

Relevant Objectives:

How would implementation of this modification impact the relevant objectives?

This modification meets relevant objective d) (i), (ii) and (iii) by increasing the accuracy of the AQ values held in the CSEP NExA table.

Impacts and Costs:

What analysis, development and ongoing costs would you face if this modification were implemented?

None have been identified
