Project Nexus Action update NEX1107

A Backstop Date is applied for the following reasons:
• following a successful Shipper Amendment against a proposed AQ calculation
• following a successful Shipper Appeal against a proposed or effective AQ calculation
• the reads utilised have calculated an LSP (Large Supply Point) AQ that does not appear reflective of the sites consumption (following Xoserve validations on the calculated AQ)

The Backstop Date applied is the date of the latest read held on UKLink and used in the annual AQ calculation.

Read 1   Read 2
 |_____|
Reads held on UKLink used to calculate AQ

                    Spec Calc Read   Spec Calc Read
                         |_____|
                    Reads used by the Spec Calc to calculate revised AQ
