

Representation - Draft Modification Report 0525 Enabling EU Compliant Interconnection Agreements

Responses invited by: **09 July 2015**

Representative:	Graham Jack
Organisation:	British Gas Trading Limited
Date of Representation:	9 July 2015
Support or oppose implementation?	Support
Relevant Objective:	g) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

The majority of the proposed changes are necessary to ensure compliance with relevant objective g). Clarification of the arrangements for the Moffat Exit Point is particularly important. The workgroup has addressed a number of concerns we had with the original draft of the proposal and now includes a formal means by which Users can ask National Grid to seek changes to Interconnection Agreements. Also, the proposal provides for obligations on National Grid to correct Interconnection Agreement process errors when identified by Users.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

As required to meet the requirements of the Regulation, and to be consistent with related UNC changes. We anticipate 1 October 2015.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

Small, related to changes to internal processes.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

None identified.

Please provide below any additional analysis or information to support your representation
