Do you support or oppose implementation?

0442 - Support

0442A - Support

If either 0442 or 0442A were to be implemented, which would be your preference?

Prefer **0442**

Please summarise (in one paragraph) the key reason(s) for your support/opposition.

0442

EDF Energy would prefer that modification 0442 was implemented as we feel that this gives adequate time for any questions around the methodology to be resolved. We believe that the methodology laid out by the AUGS is proven to be more robust than the methodology used in previous years. We feel that the costs of unallocated energy should be fairly smeared among industry participants as soon as possible. It is widely recognised that historically domestic customers have picked up a disproportionate amount of unallocated gas.

Are there any new or additional issues that you believe should be recorded in the Modification Report?

EDF Energy have no additional issues we believe should be considered.
