This was reissued in Change Summary 1393 on 8th April.

					• The spreadsheet has no information in the 'Expanded List' column but information exists in the existing list. Have Xoserve failed to copy this information across for existing values or are they planning to remove this information? • The Inbound and Outbound File columns do not exist in the existing list, are they planning to add these columns to the list (useful) or is it for information only when reviewing the CP? • The Effective Date is not populated for any row, again is this for reviewing the CP or will it be added to the document? Also is the effective date, From or To? • Why isn't the CP issued as a changed marked version of the existing list?	There are differences between the SPA legacy list and the UKLP list. The UKLP list has been created to give a view of all the rejection codes prior to UKLP go live. Should it be necessary we can request that this information be transposed at a later date. At this stage they are for information only. The UKLP rejection code list will supersede the SPA rejection code list so these will be present in the future. Effective dates were added onto of the SPA rejection code list to demonstrate the new codes that are added as a result of a change hence legacy rejection reasons have no effective date whereas the new rejection codes within the document do. With regards to UKLP rejection codes all the changes will be effective from 1st October 2015 New codes are listed in the SPA rejection list in Red and bold to highlight the changes.
