EDF	Alex Cebo	26/02/15	Not In Support	Yes	<p>1. We request that the document clarifies the point regarding notification to UK Link Committee. We note that this will not form part of the UK Link Manual but consider that this should be issued in a Change Pack, as you would as a Class 1 UK Link Modification, asking Users view of the potential implementation date.</p> <p>2. EDF Energy would request that such changes are provided with a notice period of 6 months as this will require changes to our systems to accommodate a change to this routine.</p>	<p>1. We had planned to include these within the Change Pack. Agree with your suggested approach to use notification principles in line with the Class 1 UK Modification – e.g. Notification of Proposed Classification and Implementation Date – and allowing Users to comment on these, with discussion at UK Link Committee.</p> <p>2. We note your request which will assist in planning future changes. This notice period will be highlighted for discussion at the March 2015 UK Link Committee.</p>
