

# Shared Supply Meter Points Update

4 November 2014

# SSMP & Unique Site Stats

- 117 Unique Sites
  - 13 Shared Supply Meter Points
    - 3 Interconnector SSMPs
      - Bacton
      - BBL
      - Moffat
  - 55 shippers live on Unique Sites
  - 45 shippers live on SSMPs
    - Without the Interconnectors there are 15 Shippers on SSMPs
- ✓ Low numbers but high value and high throughput

# Future Plans

- ✓ Need to bring the SSMP process into line with Faster Switching Mod 477
  - ✓ Will require a modification to bring SSMPs in line with the rest of the UNC
- ✓ The transfer process will utilise email as a UK Link Communication.
- ✓ Will require a modification to make email a UK Link Communication
- ✓ SSMP Billing process will be on line.
- ✓ Process documentation for SSMPs to be updated

# E-mail Process

## Background

- E-mail is not a recognised communication medium under the UNC
- Current processes utilise
  - Fax
  - Post
- E-mail is used as a back up to Fax for SSMPs
- Our objective is to formalise E-mail as a UK Link Communication
  - Need to establish which processes are appropriate for E-mail
  - Need to establish the controls for E-mail use
- Intention is that a new Mod be raised to achieve this. (Not Mod 479)

# E-mail Process Controls

- ❑ Only authorised E-mail addresses are allowed to utilise a specific process
- ❑ User will be able to register E-mail addresses with the Xoserve Customer Lifecycle Team
- ❑ Each process will have its own box account which will be used to receive the E-mails.
- ❑ Users will be able to create, delete and update their E-mail addresses via the Customer lifecycle Team.
- ❑ The Customer Lifecycle team will validate the current E-mail addresses with the Users at a given period. (Annually?)
- ❑ If an non-authorised user's E-mail address is used to submit an E-mail Xoserve will reject the submission back to the creator.
- ❑ An acceptance E-mail will be issued where a valid E-mail submission and a valid File have been received.
- ❑ E-mails will be deemed to have been received upon submission of the acceptance or rejection E-mail response.

# SSMP Revised Process

- ❑ Shared Supply Meter Point Notification can be submitted at least 2 months before Go Live. G1.7.10 (b) i. This applies to new SSMPs
- ❑ Supply Point Confirmation can be submitted a minimum of 14 Business days prior to go live. G1.7.10 (c) \*
- ❑ A Supply Point Objection may be raised **The deadline for an objection for SSMPs should be 4:30PM on D-3 (Operational hours rather than systematised process.)**
- ❑ All Supply points including SSMPs will sit at CO status for only 2 days as a result of the Faster switching initiative

## \* Modification

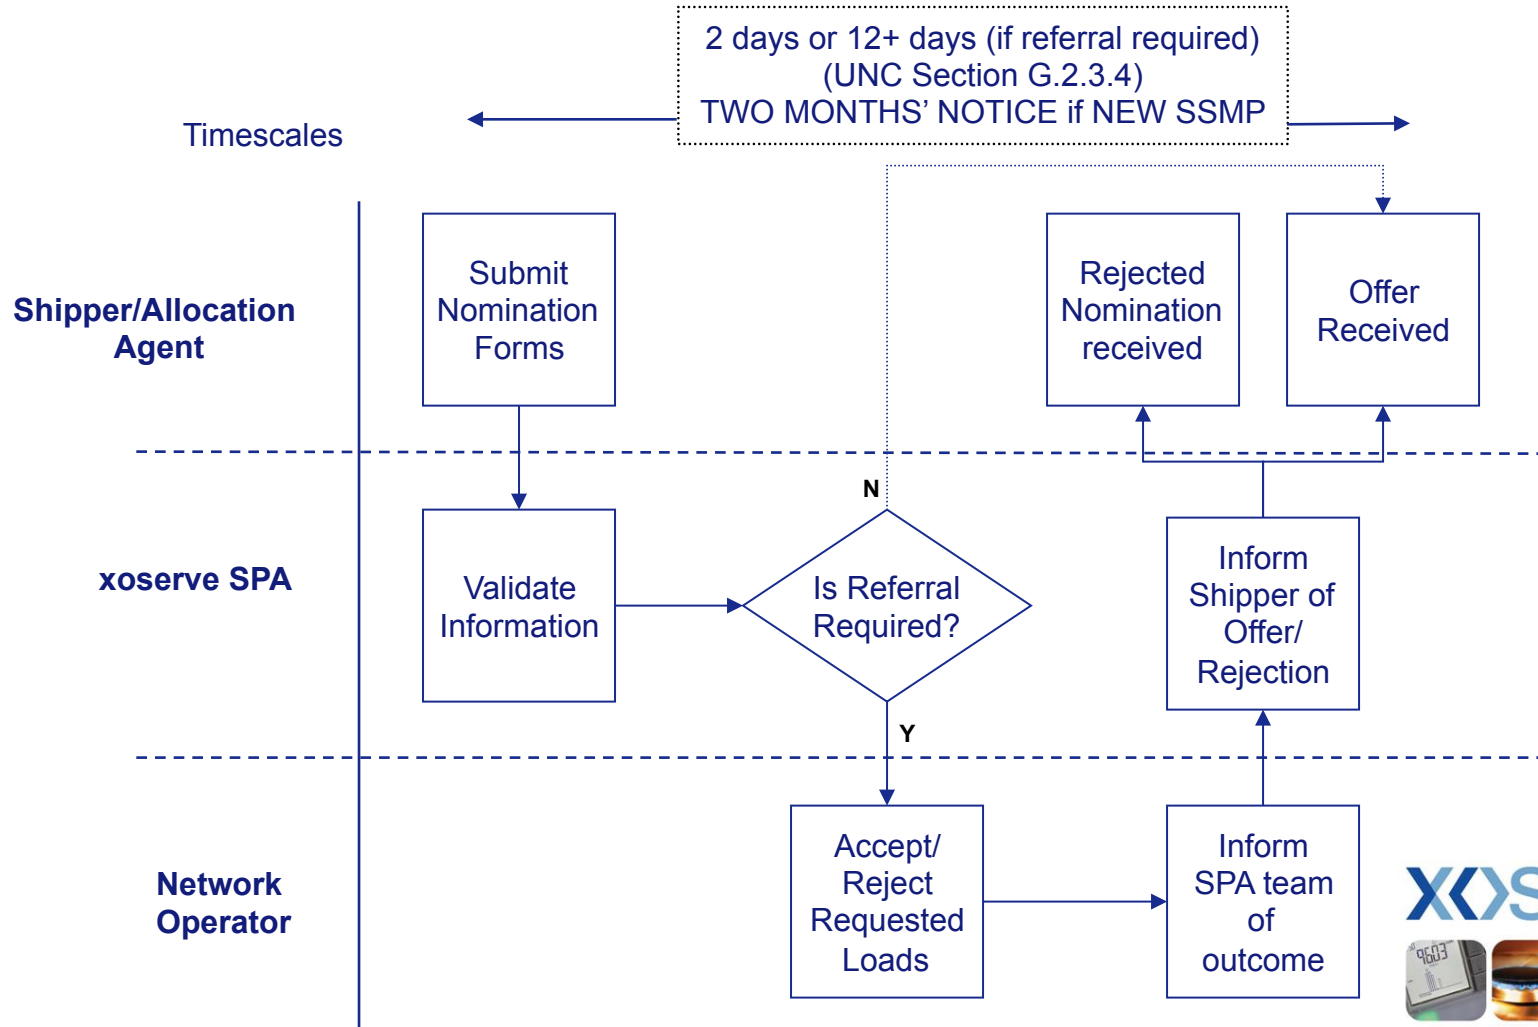

- To bring SSMPs in line with all other supply points according to the Faster Switching Mod 477 we will need to amend G1.7.10 (c) from 20 to 14 days
- Insert Objection deadline cut off point to 4:30PM on D-3.
- Does not affect maximum timescales
