

Project Nexus Settlement Workgroup Issues Log - External

ID	Date Raised	Industry Workgroup	Heading	Issue	Actions/Resolution	Date Closed
1	23/03/2011	iGT	NDM CSEPs	NDM CSEPs are currently excluded from the scope of Settlement arrangements, apart from the share of un-allocated energy, as reads are not submitted for NDM iGT sites. Energy is allocated per Shipper at 'Project' level based on the aggregate AQ. For I&C NDM CSEPs reconciliation is carried out following receipt of a reconciliation volume from the iGT.	Document concerns of the workgroup. Changes to the existing arrangements will require industry agreement & an iGT UNC Modification. AIGT representative attends PNAG.	
2	23/03/2011	Shrinkage	Shrinkage	Do the proposals for settlement affect Shrinkage calculations & should the current models be reviewed in light of Smart meters.	Pass to Shrinkage forum for consideration once rules are confirmed & SMIP outcome known.
