

Gemini 2008 Summer Release (UKL13950) Update

Implementation successfully completed

The Gemini Summer Release was successfully implemented on 17th August 2008.

The changes were effective from 10:00. It was necessary to extend the outage by an hour, from the planned 09:00 completion, to ensure amendments to Internal National Grid systems were aligned with the Gemini Release.

I would like to take this opportunity to thank all parties involved in ensuring this implementation was successful.
