Organisation:	Wales & West Utilities Ltd
Date of Representation:	9 th November 2017
Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

We support this modification as the relaxation in the criteria for releasing information for domestic MAPs should improve data consistency and help resolve discrepancies between parties. We believe that this will reduce risk for Meter Asset Providers thereby increasing competition in the domestic metering market and hence competition between domestic Suppliers.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

This satisfies the self-governance criteria; although we believe it will improve competition between Suppliers we do not think that this will be material. The largest impact will be on Meter Asset Providers.

Implementation: *What lead-time do you wish to see prior to implementation and why?*

This should be implemented within 16 days of a panel determination.

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

None

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

No

Please provide below any additional analysis or information to support your representation
