**Document Purpose**

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

Overview of proposed change			
<b>Change Details</b>		<p>Modification 520A set up a Performance Assurance Report Register (PARR) that produced a set of reports to review performance across the industry. The PARR is separated into 2 sets of reports, split by anonymised and non-anonymised reports. Schedule 1 is pre-Nexus. Schedule 2 is post Nexus. Schedule 2 reports are split into 2A – industry Peer Comparison View and 2B – Performance Assurance Committee View.</p> <p>This change proposal seeks to introduce a number of additional metric into the existing PARR Schedule 2A (Industry Peer review) reports to increase transparency across activities relating to Annual Quantity movement.</p> <p>Utilising the existing PARR reports, including the anonymity of allocated code names, it is proposed that additional metrics are included for each calendar month alongside the existing PARR reporting suite of metrics. This is provided to all Shippers alongside the monthly NRL files or included within the monthly PSR report. Alternatively these additional metrics could be supplied within folder 32 in the secure Sharepoint service provided by Xoserve.</p> <p><b>Proposed metrics</b></p> <div style="text-align: center;">             Transparency of the Rolling AQ Process (m)         </div>	
<b>Reason(s) for proposed service change</b>		<p>Project Nexus implementation introduced a monthly rolling Annual Quantity (AQ) process under MOD0432, alongside the formula year AQ. Prior to the implementation of the new arrangements, the outcome of the annual AQ Review process was published to all market participants to provide transparency around the movement in gas allocation volumes,</p>	

	<p>introduced by Modification 0081. The transparency around movements made to gas allocation volumes, under MOD0081, have ceased to continue under the new arrangements.</p> <p>Because there are commercial practices reliant on the accuracy of AQ values, this change proposal seeks to reintroduce a number of those metrics to provide Parties with the same transparency as was apparent prior to Project nexus, thus providing all parties with greater confidence that the accuracy and reliability of AQ's is maximised.</p> <p>The current reporting metrics introduced by MOD0520A do not provide Parties with the visibility of movements in AQ across the market. Whilst reconciliation does now take place for both LSP and SSP, Parties still require confidence that the accuracy and reliability of AQ's is maximised. This Change seeks to enhance the transparency across the market movements, whilst protecting company sensitive information by continuing with the anonymity of using code names.</p> <p>With the current volatility around Unidentified Gas (UIG) causing concern across the market, there is a lack of visibility around activity across the market. Without this reporting in place to give assurance and transparency, there is a potential for Parties to question the validity and accuracy of gas allocation, as there is a dependency on other parties to give confidence that reconciliation is taking place on a regular basis across all market participants. Uncertainty around this can result in risk premiums being passed onto customers. We believe that, as this reporting was provided previously and, with the implementation of Project Nexus, the information should be readily available from the new SAP platform that UK Link resides and therefore should not require significant cost to develop.</p> <p>This transparency of gas allocation brought about under MOD0081 has ceased to continue under the new arrangements. This had previously given all Parties a clear understanding of movements in gas allocation across the market. There are commercial practices reliant on the accuracy of AQ values; this change proposal seeks to reintroduce a number of those metric to provide Parties with the same transparency and confidence as was apparent with the annual AQ Review process.</p>

## Section 4: ROM Analysis

This ROM is Xoserve’s response to the above Evaluation Service Request. The response is intended to support customer involvement in the development of industry changes.  
Should the request obtain approval for continuance then a Change Proposal must be raised for any further analysis / development.

**Disclaimer:**

This ROM Analysis has been prepared in good faith by Xoserve Limited but by its very nature is only able to contain indicative information and estimates (including without limitation those of time, resource and cost) based on the circumstances known to Xoserve at the time of its preparation. Xoserve accordingly makes no representations of accuracy or completeness and any representations as may be implied are expressly excluded (except always for fraudulent misrepresentation).

Where Xoserve becomes aware of any inaccuracies or omissions in, or updates required to, this Report it shall notify the Network Operators’ Representative as soon as reasonably practicable but Xoserve shall have no liability in respect of any such inaccuracy or omission and any such liability as may be implied by law or otherwise is expressly excluded.

This Report does not, and is not intended to; create any contractual or other legal obligation on Xoserve.

## Appendix One: Glossary

Term	Definition
Adverse Impact	<p>A Service Change has or would have an Adverse Impact on Customers of a particular Customer Class if:</p> <p>(a) Implementing the Service Change would involve a modification of UK Link which would conflict with the provision of existing Services for which such Customer Class is a Relevant Customer Class;</p> <p>(b) the Service Change would involve the CDSP disclosing Confidential Information relating to such Customers to Customers of another Customer Class or to Third Parties;</p> <p>(c) Implementing the Service Change would conflict to a material extent with the Implementation of another Service Change (for which such Customer Class is a Relevant Customer Class) with an earlier Proposal Date and which remains Current, unless the Service Change is a Priority Service Change which (under the Priority Principles) takes priority over the other Proposed Service Change; or</p> <p>(d) Implementing the Service Change would have an Adverse Interface Impact for such Customers.</p>
General Service	A service provided under the DSC to Customers or Customers of a Customer Class on a uniform basis.
Non-Priority Service Change	A Service Change which is not a Priority Service Change
Priority Service Change	<p>A Modification Service Change;</p> <p>or</p> <p>A Service Change in respect of a Service which allows or facilitates compliance by a Customer or Customers with Law or with any document designated for the purposes of Section 173 of the Energy Act 2004 (including any such Law or document or change thereto which has been announced but not yet made).</p>
Relevant Customer class	A Customer Class is a <b>Relevant Customer Class</b> in relation to a Service or a Service Change where Service Charges made or to be made in respect of such Service, or the Service subject to such Service Change, are or will be payable by Customers of that Customer Class
Restricted Class Change	Where, in relation to a Service Change, not all Customer Classes are Relevant Customer Classes, the Service Change is a <b>Restricted Class Change</b> ;
Service Change	<p>A change to a Service provided under the DSC (not being an Additional Service), including:</p> <p>(i) the addition of a new Service or removal of an existing Service; and</p> <p>(ii) in the case of an existing Service, a change in any feature of the Service specified in the CDSP Service Description, and any related change to the CDSP Service Description</p>
Specific Service	A service (other than Additional Services) available under the DSC to all Customer or Customers of a Customer Class but provided to a particular Customer only upon the order of the Customer.
