Document Purpose

This document is intended to provide a single view of a change as it moves through the change journey. The document is constructed in a way that enables each section to build upon the details entered in the preceding section. The level of detail is built up in an incremental manner as the project progresses.

The template is aligned to the Change Management Procedures, as defined in the CDSP Service Document. The template is designed to remove the need for duplication of information. Where information is required in one section but has been previously captured in a previous section, the previous section will be referenced.

The summary table on the front page shows the history and the current status of the Change Proposal.

Overview of proposed change			
Change Details	<p>The Gemini IT system is currently owned by National Grid and operated and maintained by Xoserve. Xoserve have advised National Grid that this system is now operating on aging hardware and infrastructure software which brings increasing risks to its security, availability and resilience. Certain components are approaching a stage where they will no longer be supported by Xoserve's IT contractors. While extended support may be possible it is not guaranteed and is likely to increase costs, therefore risks of component failure and unavailability of replacement parts will start to increase. Xoserve have therefore recommended that an investment to sustain the system into the future is undertaken.</p> <p>National Grid has already engaged with Xoserve to explore the options and proposes to implement new hardware and software upgrades via a re-platform activity. A re-platform represents an economic alternative to replacement, and would be expected to sustain Gemini until the mid-2020s. The location of where the system would be hosted could either be 'on premises' i.e. the system would continue to be hosted in a Xoserve data centre, or on a private cloud. The initial analysis phase would investigate the optimum hosting arrangement, taking into account an updated view of the non-functional requirements (system availability, number of users etc).</p> <p>National Grid has engaged with customers at the Operational Forum in November 2017 regarding this change and received a strong endorsement to re-platform Gemini at this stage rather than embark on a complete replacement. (Output from this engagement is included as an appendix to this change proposal). National Grid has also sought feedback from customers on difficulties that they currently experience with Gemini and we will be engaging with Xoserve to explore how these can be addressed; whether by this proposed project or in parallel.</p>		

	<p>The purpose of this change proposal is therefore to confirm that National Grid wishes to re-platform Gemini and to request that Xoserve produces a Business Evaluation Report (BER) containing:</p> <ul style="list-style-type: none"> • firm costs for the analysis and design phase, • high level estimated costs for build, testing and implementation by financial year • ‘run the business’ cost estimates by financial year; and • analysis and recommendation about whether Gemini would best be hosted ‘on premises’ or on a private cloud. <p>This change proposal also requests that Xoserve deliver the re-platform solution that is ultimately selected by National Grid.</p> <p>All of the above is subject to internal financial sanctioning within National Grid.</p>
Reason(s) for proposed service change	<p>This change is proposed to enable Gemini to be sustained into the future and to mitigate the risks identified in the above section.</p>

Benefits of change	<p>This change is expected to deliver the following benefits:</p> <ul style="list-style-type: none"> • Risk mitigation to future Gemini performance • Provide confidence to National Grid and its customers about the hardware and software integrity of Gemini • Enable the optimum technical option for re-platforming to be assessed and confirmed. • Extend hardware/software support
Required Change Implementation Date	<p>Timescales are provisional at this stage but it is currently expected that the re-platform will be completed during Q1 2020.</p>
Please provide an assessment of the priority of this change from the perspective of the industry.	<p><input type="checkbox"/> High <input checked="" type="checkbox"/> Medium <input type="checkbox"/> Low</p> <p>Rationale for assessment:</p> <p>Customers will not see any functional change to Gemini as a result of this change proposal, but it would benefit the industry by reducing the risk to their commercial operations that would accompany a Gemini failure. Any requirements for changes to customers’ systems and testing will be known once the design phase has been completed and</p>

will be communicated to the industry at the appropriate time.

National Grid has sought feedback from customers on difficulties that they currently experience with Gemini and will be engaging with Xserve to explore how these can be resolved; whether by this proposed project or in parallel.

Appendix: Output of Customer Engagement at the Operational Forum 23rd November 2017

The comments made by customers on these post-it notes are as follows:

"Knowing the costs to the community and the length of time each project would take would help us make a decision"

"Re-platform preferable due to timing of RIIO-T2. Will take too long to release a whole new version."

"Re-platform. Nexus was really expensive for industry."

Section 3: ROM Request Acceptance

Is there sufficient detail within the ROM Request to enable a ROM Analysis to be produced?	<input type="checkbox"/> Yes <input type="checkbox"/> No
If no, please define the additional details that are required.	

If the ROM Request is not accepted. Please forward this document to the Portfolio Office for onward transmission to the Change Management Committee

Section 4: ROM Analysis

This ROM is Xoserve's response to the above Evaluation Service Request. The response is intended to support customer involvement in the development of industry changes.
Should the request obtain approval for continuance then a Change Proposal must be raised for any further analysis / development.

Disclaimer:

This ROM Analysis has been prepared in good faith by Xoserve Limited but by its very nature is only able to contain indicative information and estimates (including without limitation those of time, resource and cost) based on the circumstances known to Xoserve at the time of its preparation. Xoserve accordingly makes no representations of accuracy or completeness and any representations as may be implied are expressly excluded (except always for fraudulent misrepresentation).

Where Xoserve becomes aware of any inaccuracies or omissions in, or updates required to, this Report it shall notify the Network Operators' Representative as soon as reasonably practicable but Xoserve shall have no liability in respect of any such inaccuracy or omission and any such liability as may be implied by law or otherwise is expressly excluded.

This Report does not, and is not intended to; create any contractual or other legal obligation on Xoserve.

Appendix One: Glossary

Term	Definition
Adverse Impact	<p>A Service Change has or would have an Adverse Impact on Customers of a particular Customer Class if:</p> <p>(a) Implementing the Service Change would involve a modification of UK Link which would conflict with the provision of existing Services for which such Customer Class is a Relevant Customer Class;</p> <p>(b) the Service Change would involve the CDSP disclosing Confidential Information relating to such Customers to Customers of another Customer Class or to Third Parties;</p> <p>(c) Implementing the Service Change would conflict to a material extent with the Implementation of another Service Change (for which such Customer Class is a Relevant Customer Class) with an earlier Proposal Date and which remains Current, unless the Service Change is a Priority Service Change which (under the Priority Principles) takes priority over the other Proposed Service Change; or</p> <p>(d) Implementing the Service Change would have an Adverse Interface Impact for such Customers.</p>
General Service	A service provided under the DSC to Customers or Customers of a Customer Class on a uniform basis.
Non-Priority Service Change	A Service Change which is not a Priority Service Change
Priority Service Change	<p>A Modification Service Change;</p> <p>or</p> <p>A Service Change in respect of a Service which allows or facilitates compliance by a Customer or Customers with Law or with any document designated for the purposes of Section 173 of the Energy Act 2004 (including any such Law or document or change thereto which has been announced but not yet made).</p>
Relevant Customer class	A Customer Class is a Relevant Customer Class in relation to a Service or a Service Change where Service Charges made or to be made in respect of such Service, or the Service subject to such Service Change, are or will be payable by Customers of that Customer Class
Restricted Class Change	Where, in relation to a Service Change, not all Customer Classes are Relevant Customer Classes, the Service Change is a Restricted Class Change ;
Service Change	<p>A change to a Service provided under the DSC (not being an Additional Service), including:</p> <p>(i) the addition of a new Service or removal of an existing Service; and</p> <p>(ii) in the case of an existing Service, a change in any feature of the Service specified in the CDSP Service Description, and any related change to the CDSP Service Description</p>
Specific Service	A service (other than Additional Services) available under the DSC to all Customer or Customers of a Customer Class but provided to a particular Customer only upon the order of the Customer.
