

17<sup>th</sup> August 2006

Dear Colleague,

Annual Invitation to Participate in Auction  
of Quarterly System Entry Capacity

Pursuant to Section B2.2.1 (d) of the Transportation Principal Document (TPD) of the Uniform Network Code (UNC), National Grid Gas plc (National Grid) invites you to take part in the 2006 auction for Quarterly System Entry Capacity (QSEC).

The provisions of the Uniform Network Code (including in particular, but not limited to, TPD Section B) shall apply to this invitation, the 2006 Annual System Entry Capacity auction for QSEC, any bids made and rejected or accepted pursuant to such auction, and any subsequent allocation of QSEC.

Users may make applications for QSEC for each calendar quarter for the capacity period April 2008 to March 2023 (inclusive).

Timing

In accordance with UNC Section B2.2.1(d), National Grid will conduct the annual QSEC auction between 18<sup>th</sup> September 2006 and 29<sup>th</sup> September 2006 on the annual invitation dates listed below.

- Monday 18<sup>th</sup> September
- Tuesday 19<sup>th</sup> September
- Wednesday 20<sup>th</sup> September
- Thursday 21<sup>st</sup> September
- Friday 22<sup>nd</sup> September
- Monday 25<sup>th</sup> September
- Tuesday 26<sup>th</sup> September
- Wednesday 27<sup>th</sup> September
- Thursday 28<sup>th</sup> September
- Friday 29<sup>th</sup> September

In accordance with the provisions of the UNC (and, in particular, TPD Section B 2.2.19), National Grid shall be required to close the annual QSEC auction before the last date listed above in the case of stability being reached after interim bid window 2.

## Volumes Of Capacity

The Unsold NTS Entry Capacity (kWh/day) for each Aggregate System Entry Point (ASEP) that is being offered for each quarter is shown in Table 2. They are in accordance with the quantities defined in Appendices 2D of the Transportation Statement.

The Unsold NTS Entry Capacity reserve prices (p/kWh/day) for each ASEP together with the price steps for each incremental capacity amount above the Unsold NTS Entry Capacity, are shown in Tables 3-7 (inclusive). The price steps are based on an aggregate increment size in accordance with the Uniform Network Code. For the 2006 QSEC allocation the pertinent NTS SO Baseline quantities for determination of incremental volumes are those relevant for 2006/7. The figures provided in these tables are in accordance with those defined in Appendices 2D of the Transportation Statement.

Following the Authority's consent under the UNC, National Grid NTS will require up to a 4-year lead time before it will release incremental capacity, up to 150% of baseline, in the forthcoming QSEC auctions at the following locations:

- Milford Haven
- Easington
- Bacton
- St Fergus
- Fleetwood

As a result this will have the effect that National Grid NTS would release in the 2006 QSEC auction the amounts of incremental capacity as set out in Table 1 below for the periods outlined, as opposed to the Minimum Incremental Amount that would otherwise be required to be offered. (i.e. 150% of baseline).

At the following location a request for capacity > 150% of baseline had been requested, but due to a 3 year lead time being insufficient the amount of incremental capacity to be released is set out in Table 1. The remaining incremental capacity >150% baseline will be available after a 4 year lead time.

- Cheshire

Please be aware that for the purposes of carrying out the auction, in Gemini there will be one price stack showing price steps from P0 up to P20. The amount of incremental capacity available at each ASEP is detailed in Tables 3 to 7. The tables also show the periods in which capacity is withheld as ghost text, and is in line with the amounts in Table 1.

Following Ofgem's consultation on the Unit Cost Allowances (UCAs) for large new entry points (Ref. 120/06), the Fleetwood ASEP will have a profile of UCAs for bands of capacity, rather than a single number. The Incremental Entry Capacity Release (IECR) Methodology Statement requires that the net present value (NPV) of bids received at an ASEP through the QSEC auction must cover at least 50% of the UCA for National Grid to release permanent obligated incremental capacity. This is based on there being a single UCA. For clarity, as indicated by Ofgem in section 2.17 of their consultation document, where a profile of UCAs is set for an ASEP, National Grid will use in the determination of whether to release permanent obligated incremental capacity the UCA for the band of capacity that the new entrant has indicated to Ofgem as their likely desired flow rate (as expressed in their formal UCA application to Ofgem) i.e. we will use the highest UCA.

National Grid's opinion of the future demand for entry capacity is broadly reflective of the range of supply expectations as described in its Ten Year Statement 2005 (chapter 4). National Grid's supply forecasts are built from information received from a combination of its Transporting Britain's Energy (TBE) consultation process and commercial sources. Details of National Grid's supply and demand forecasts are further described in Appendix 2 of the Ten Year Statement. It is anticipated that the bids for the long-term capacity (QSEC) auctions will provide a further source of information.

Please note that this message is being sent by e-mail by the Joint Office and by fax (business hours operational list) and will be posted on the Information Exchange Website. ([www.nationalgrid.com/uk/gas/data](http://www.nationalgrid.com/uk/gas/data)). The delivery notification audit report will be considered as evidence of receipt.

If you have any queries with regards to the auction process then please do not hesitate to contact me, on 01926 654 071 or Hannah Morgan on 01926 653 444, or Bea Ennim on 01926 653 448.

If you have any problems pertaining to the Daily Auctions, please contact National Grid GNCC on 01926 653 206.

Yours sincerely

Chris Gumbley

Table 1 Total Amount of Incremental Capacity to be Released at Milford Haven, Bacton, St Fergus and Easington, Fleetwood and Cheshire.
