

# Gas Day Jan 4<sup>th</sup> 2010

Transmission Workstream 07/01/10

Ritchard Hewitt

**nationalgrid**

The power of action.™

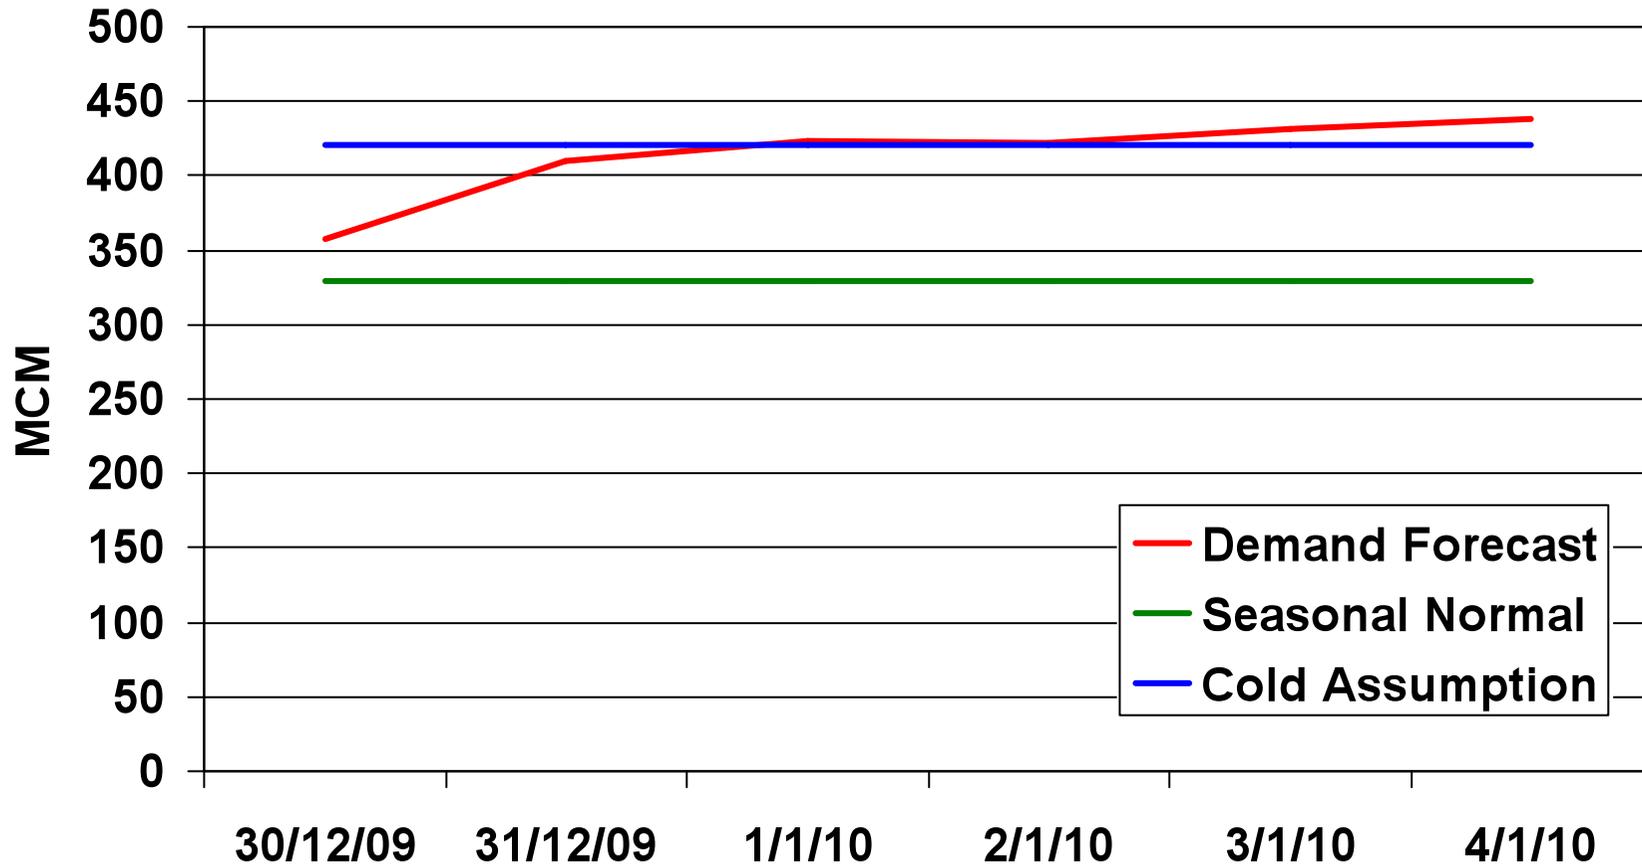

# Purpose of presentation

---

- ◆ Go through the high level time line of events on the Day
- ◆ Share information that was available to National Grid at key times in the day
- ◆ Get shipper feedback on what worked and what didn't
- ◆ Operations Forum on 13<sup>th</sup> January for more detail.

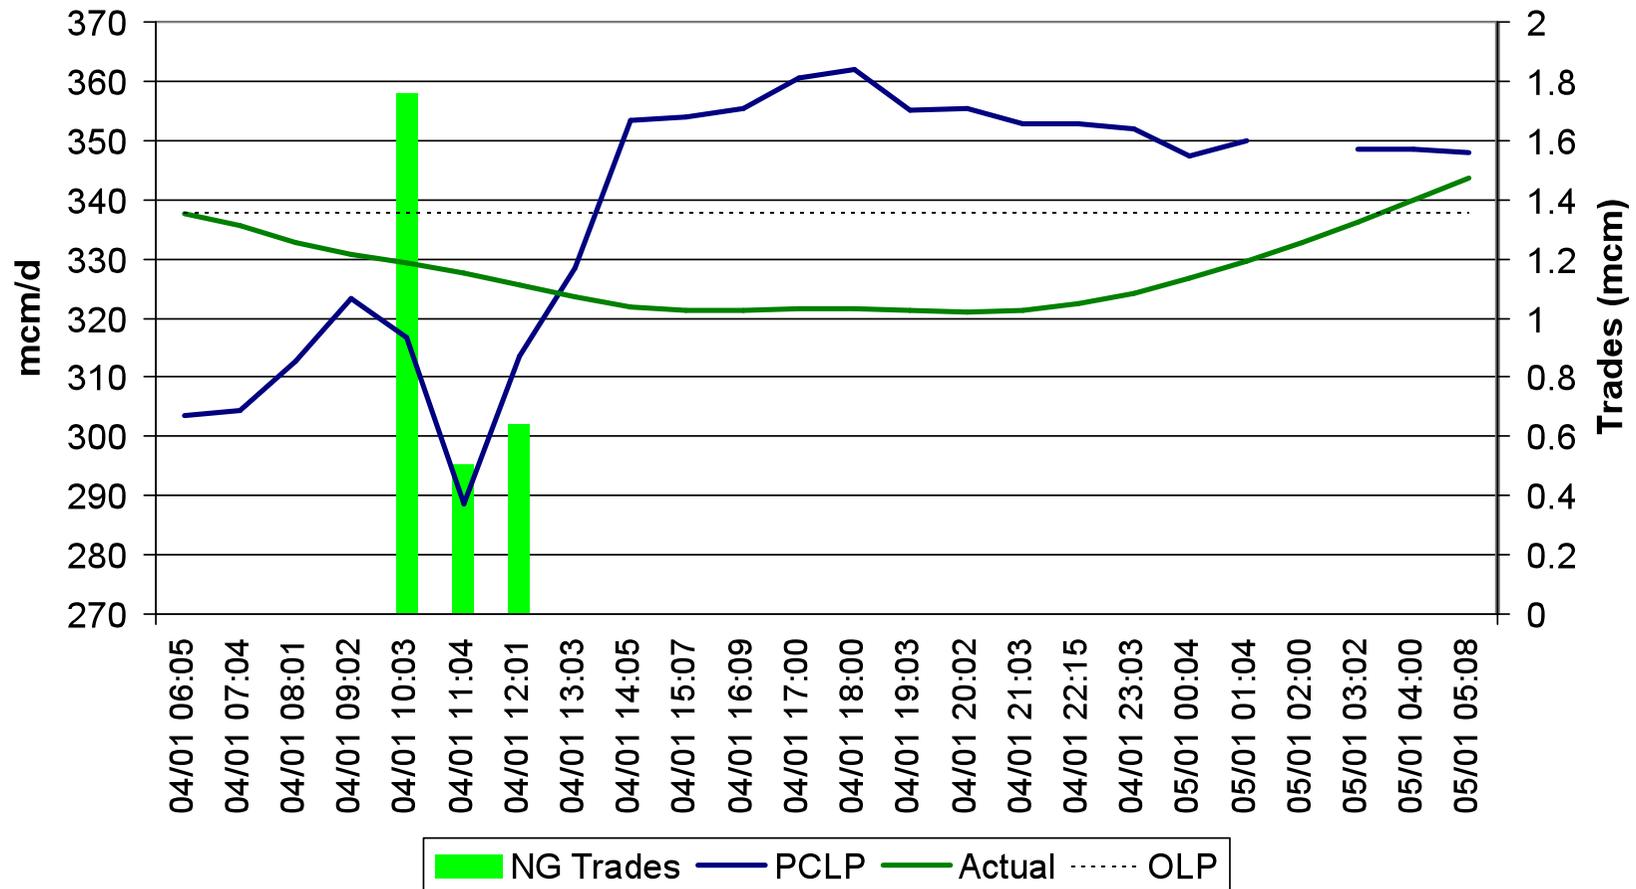

# Leading into the day

## Demand Forecasts FOR 04 Jan 10

# Linepack Graph for 04 Jan 2010

PCLP, Actual Linepack vs Target Linepack and National Grid Trades  
31/12/2009 to 06/01/2010

# Closing comments

---

- ◆ Very high demand following holiday period
- ◆ Very shallow initial OCM market
- ◆ Demand forecast change mid morning
- ◆ Little obvious immediate response to demand change from supplies
- ◆ Notified of significant supply losses
- ◆ Serious Actual Linepack forecast requiring immediate and concerted action by all parties
- ◆ GBA and Market Balancing Actions combined with industry action saw a significant and very successful response to the wintery conditions
