

## **Modifications 0633 and 0638 Legal Text Commentary – Version 3**

The revised legal text states that where there is a Smart of AMR device installed at a site, the Meter Read Frequency shall be no greater than Monthly. This means that there is no obligation to obtain daily reads for these sites even though it is possible to do so.

The text also places an obligation on Shippers to take all reasonable steps to obtain and submit at least one Valid Meter Reading per month for these sites, with the option to submit more than one. The option to submit more than one reading is in line with CMA Order: Part 2 – Section 3.3 that states that all Valid Meter Readings obtained since the previous submission should be submitted to the Relevant Gas Transporter at least once per month.
