Support or oppose implementation?	Support
Relevant Objective:	d) Positive

Reason for support/opposition: Please summarise (in one paragraph) the key reason(s)

This modification aims to make the existing process of releasing data to the Meter Asset Provider more efficient, which should facilitate an improvement in data quality.

While reducing the number of fields necessary to validate a request may lead to an increase in erroneous requests the probability of this seems low, in our opinion, compared with the probability of a valid request being rejected under the current process. (10-15%)

As the existing measures to protect the inappropriate use of this data remain unchanged, any increase in erroneous requests should not have a wider impact on the industry.

Self-Governance Statement: *Please provide your views on the self-governance statement.*

None

Implementation: *What lead-time do you wish to see prior to implementation and why?*

As soon as possible

Impacts and Costs: *What analysis, development and ongoing costs would you face?*

No impact analysis was conducted.

Legal Text: *Are you satisfied that the legal text will deliver the intent of the Solution?*

Yes.

Are there any errors or omissions in this Modification Report that you think should be taken into account? *Include details of any impacts/costs to your organisation that are directly related to this.*

None.

Please provide below any additional analysis or information to support your representation

No additional analysis or information.
