Key Messages

- 0630R considered the differences between the level 1, level 2 and level 3 changes:
 - Level 1 – core changes - delivery of CSS
 - Level 2 – consequential changes - change “prescribed” by the CSS
 - Level 3 – sustaining changes - change “initiated” by the CSS – focus of 0630R
- The 15 topic areas of the Business Requirements Document (BRD) were reviewed and all changes assessed as Level 1, 2 or 3. The document is available here:
<https://www.gasgovernance.co.uk/0630/260118>
- Level 3 topics are being considered within 0630R
- The next meeting is scheduled for 21st February where Topic Area *3.5 Change of Shipper required information* will be discussed and developed. This topic will consider Shipper requirements regarding how the Supply Point on UK Link can be established with the required settlement data in line with a switch event on the Central Switching System.
