

UNC Modification 0663S Extending the provision of supply point data to suppliers via API services and iUNC Modification 114 Extending the data available to Suppliers under K24.3(I)

The following table details the data items sought to be made available to Suppliers under UNC and iUNC. The data items are grouped by inclusion in the Data Enquiry Service (DES) Supplier Community view or not. Note that recent modifications have permitted the release of data to Suppliers for domestic consumers only. Modifications 0663S and 114 are for all supply point data regardless of domestic / non-domestic status.

Data item	In DES Supplier community view?	Justification	Development workgroup comments
Annual Quantity	N (but already permitted by mod 0640 for domestic supply points)	Required to validate any consumption information provided by the consumer and to provide quotation services.	
Formula Year Annual Quantity	N	Required to provide quotation services as the Supplier's Shipper will be charged on this data item, so ensures Supplier quote to consumer matches expected transportation charges to Shipper.	
Supply Meter Point system offtake quantity	N	Required to provide quotation services as the Supplier's Shipper will be charged on this data item, so ensures Supplier quote to consumer matches expected transportation charges to Shipper.	
Formula Year Supply Meter Point system offtake quantity	N	Required to provide quotation services as the Supplier's Shipper will be charged on this data item, so ensures Supplier quote to consumer matches expected transportation charges to Shipper.	
Supply Meter Point system hourly quantity	N	Required to provide quotation services as the Supplier's Shipper will be charged on this data item, so ensures Supplier quote to consumer matches expected transportation charges to Shipper.	Challenge that this is not required for the Supplier to provide a quotation to the customer
Meter status	N	Required to support customer account set-up. As the Supplier is responsible for the provision of metering

		services early identification that there is no meter present or the meter is clamped (or that central data is inconsistent with the physical meter) will help the Supplier to take any necessary steps and to set up the consumer record correctly.	
Isolation status	N (not in DES at all)	This is a function of Meter Status (where one is installed or has been removed / clamped). Helpful in setting up the customer account.	
Meter Asset Manager short code	N	Required to help the Supplier establish the correct commercial relationships for metering services.	
Latest Meter Reading	N	Required to help the Supplier validate the opening meter reading (note: this information is provided in the MRI file to the Shipper prior to the confirmation effective date).	
Meter Reading date	N		
Meter Reading type	N		
Automated meter reading (AMR) indicator	N	Required to help the Supplier establish the correct commercial relationships for meter reading services.	
Automated meter reading (AMR) service provider identity.	N (not in DES at all)	Required to help the Supplier establish the correct commercial relationships for meter reading services.	
Supply Meter Point Reference Number,	Y		
supply point address	Y		
Meter Post Code	Y		
Unique property reference number	Y		
Local Distribution Zone	Y		

Data item	In DES Supplier community view?	Justification	Development workgroup comments
Current supplier ID	Y must accept additional terms		
Incoming supplier	Y must accept additional terms		
network operator	Y		
Transporter identity	Y		
Transporter effective from date	Y		
CSEP identifier	Y		
Supply Meter Point status	Y		
Supply Point Withdrawal status	Y		
Market Sector Code	Y		
Existence of Interruption	Y		
meter serial number	Y		
meter mechanism code (includes Smart Meter Equipment Technical code)	Y		
meter capacity	Y		
Meter type	Y		
Meter number of dials	Y		
Meter imperial indicator	Y		
Classification of Twin-Supply Meter Point	Y		
Smart meter system operator identity	Y		

Data item	In DES Supplier community view?	Justification	Development workgroup comments
Smart meter system operator effective from date	Y		
Data Communications Company service flag	Y		
Data Communications Company service flag effective from date	Y		
Identity of the installing supplier of the smart meter	Y		
Smart metering equipment technical specification installation date	Y		
In home display installation status	Y
