Have your say: RIIO-2 Gas Transmission Incentive Stakeholder Consultation

Stakeholder engagement has been central to the development of our RIIO-2 incentive package. Over the last 12 months we have attended regular operational forums and external events, issued newsletters, held webinars, met customers and stakeholders individually, attended industry groups and liaised with Ofgem. We are very grateful for your time and effort in engaging with us and this has been essential in helping us shape our RIIO-2 business plan.

On the 19th of December 2019, we launched our stakeholder consultation on the proposed Output Delivery Incentives (ODIs) that form part of our RIIO-2 Gas Transmission Business Plan. This consultation is open until at least the 30th of January 2020 and we would welcome and value your feedback on our business plan incentive proposals. We will respond to questions directly, and where appropriate, publish clarifications and responses to questions on our website throughout the consultation period.

The document is available on our website by clicking [here](#), or by using the following link:
<https://www.nationalgridgas.com/document/129251/download>.

On conclusion of this consultation process, we will publish a report that summarises feedback we receive and any further recommendations we draw from it, that either support our business plan proposals or demonstrate a case for change.

If you have any questions or would like to discuss further, please don't hesitate to contact either Mike or Carol on the details below.
